

Congratulations to **Dr. Mengwan Li** for successfully defending her PhD thesis, “Atomic-Scale Investigation of Solute Effects on Plastic Deformation in NiV Alloys!”

During her PhD studies, Mengwan also co-founded a high-tech startup, Hong Kong X-Wheel Intelligence Technology Limited, specializing in intelligent industrial non-destructive testing and advanced robotics, thanks to the support of HK Tech 300.

She will soon join the Hong Kong Productivity Council (HKPC) as a postdoc research fellow, to continue her research in computational materials science.
