

Area of Excellence (AoE) grant

I am thrilled to announce that our team has been awarded a prestigious Area of Excellence (AoE) grant by the Research Grants Council (RGC) of Hong Kong to establish the **Hong Kong Center for Neutron Scattering (HKCNS)**.

Over the next 5 years, HKCNS will serve as a premier intellectual hub advancing neutron scattering science and technology. Our team brings together 12 co-PIs—spanning 4 senior professors and 8 early- to mid-career scholars—to tackle critical problems where neutron scattering provides decisive insights:

- Quantum Spin Systems
- Complex Alloys Extreme Conditions
- Nanoscale Structure & Ionic Transport in Energy Materials
- Molecular Interactions in Nanomedicine

A formal announcement from RGC can be found

A huge thank you to the RGC for supporting this vision. We look forward to collaborating with the broader scientific community to drive impactful discoveries.
